DOJ,

As I watch all the crybabies and the dumb states that's out to make Microsoft a so called Monopoly. I would think you let the people of USA make a vote on this.

I like Bill Gates, I love his software and 97% of us all used it, as I am using it as I type this email, as you will receive this email with Microsoft help somewhere on somebody's mail server.

I own a Chevrolet and nobody made me buy it, if I wanted a Ford, I have it. Same as Software, I want Microsoft and don't want Linux. The other day I was in a OfficeMax and did not see the first software add on for Linux.

If the DOJ would start paying people to write software for Linux for free, Microsoft will not make it, and look at all the Tax dollars that go out the Window for the Irs

Take my Vote and leave Microsoft to US we the American People we will make then are brake them.
Thanks
Robert Bass
